DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 08/24/2009 has been entered.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 26, 29-32, 35, 37-39 are rejected under 35 U.S.C. 102(b) as being anticipated by 6589950.

The reference is the equivalent of WO 01/09134, and the PCT pub date of 2/8/2001 is relied on.

See Example 147:

See Example 151:

These correspond to R17=H, B=choice (a), with E and F ring as phenyl and R2 as aminocarbonyl. A= choice (b), X1= NH, R3=R4=methoxy, m=1 or 2.

The remarks state that the claims avoid overlap, but do not say why, and the examiner does not see how overlap has been avoided.

The methoxy group required by the closest species in 6897307 is not permitted by the R2 definition in claims 26 or 33.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 21-26, 36, and 34-39 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

1. A definition is needed for the term "BINAP".
2. The starting material and product in claim 39 step f is illegible. Note the more legible versions of similar compounds in step g.
3. Claim 25 provides for "stereochemically isomeric forms thereof." But none of the species has a chiral atom. Hence, these are impossible. Applicants must either remove this provision or add a compound with a chiral center.
4. The next to last line of claim 26 has "a ...salts". Applicants must either delete the "a", or make the "salts" singular".

Claim Objections

Claim 24 is objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend on both of two claims 23 and 25; it must depend in the alternative. See MPEP § 608.01(n). Likewise claim 38.

Claims 27-28, and 33 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
